

Professional Development

Unleash the potential of your LearnMate Programs!

"The training provided by intelitek was the finest professional training event of my 30-plus-year industrial education career."

**Don Mroz, Professor
Dalton State College**

For more than 25 years intelitek has supplied complete technology solutions to the educational marketplace. Our solutions include advanced technologies implemented within comprehensive programs for Advanced Manufacturing, Engineering, Robotics, and Industrial Maintenance. These innovative programs are revolutionizing technology training.

Our Professional Development training program is the key to unlocking the full potential of our LearnMate programs.

These teacher training courses cover the Learning Management System (LMS), LearnMate Content and LearnMate courseware. These courses have empowered teachers to achieve success with LearnMate programs. By demonstrating advanced features step-by-step, outlining best practices using LearnMate features in the classroom and explaining how the program can best meet your specific needs, our professional development program can help you produce amazing results in your classroom.

LearnMate

2008 Schedule

During July intelitek offers Professional Training for those currently implementing LearnMate Programs, as well any considering doing so. The schedule for 2008 follows:
